

Easy-yet-advanced Access Control for today and tomorrow. Only from Lenel®.

Web-based goEntry™ 3.0

If you're looking for out-of-the-box access control that's simple yet sophisticated, goEntry 3.0 is the perfect choice. It's web-based; no server needed. It's easy to install and operate; no special training or added software required. It's ready for fast integration with TruVision surveillance recorders and cameras for complete video capabilities. And along with a cost-effective price today, you're also ready for tomorrow. goEntry 3.0 is from the access control leader, Lenel, so in the future, you can move up to an enterprise solution as your needs grow. As Lenel integrates goEntry with OnGuard®, you will be able to choose your level of management: local to central, or a hybrid in between – and easily modify as requirements evolve.

There's much more, like an iPad app for untethered, remote control... capabilities for up to 64 doors and cameras... simplified wizard-based installation...and more. Take a look and see why goEntry 3.0 is the ideal "go-to" solution.

Rich features. Streamlined operation.

Easy-to-use:

- Web browser-based operation
- Access to wizards, tool tips, quick start guide and context-sensitive help for everyday tasks
- Intuitive, icon-based, graphic user interface works with most browsers (Internet Explorer, Chrome, Safari, Firefox)
- Native iPad® app to remotely monitor system activity and perform basic administrative tasks, freeing personnel from being tied to a workstation
- Unix-based platform reduces virus risk
- Multiple languages (English, Spanish, French, Brazilian Portugese, Dutch)
- Enroll cards via USB reader
- · Graphical diagnostic dashboard
- Intuitive report generation
- · Minimal training

Intuitive user interface makes operations even easier:

- Clean, icon-based screens
- User wizards
- Step-by-step instructions
- Comprehensive tool tips
- Context-sensitive help
- Graphical diagnostics
- Rich functionality for simple search, reports and schedules
- Video integration with truVision surveillance recorders

Seamless Video Integration

Low Total Cost of Ownership

- No dedicated server greatly reduces up-front cost
- No software, or licensing required greatly reduces your total cost of ownership
- Eliminates need for software installation and on-going licensing
- No application, operating system or database maintenance required
- FREE upgrades no annual software licensing fees

Access features delivering Lenel performance

- The confidence of a system from Lenel 92% of Fortune 100 companies use Lenel products
- Future upgrade path move up to
 OnGuard as your needs expand so
 your goEntry investment is protected and
 migrates with you
- Simple and intuitive video integration with access events
- Data backup capability
- User-definable fields
- Remote door control (open, lock, lock out and reinstate doors remotely)
- Scheduling with recurring holidays
- Reader groups and schedules
- Enforced anti-passback
- Flexible reader choices use any Wiegand reader

A great solution for varied needs

In future releases goEntry hardware will be able to be retained and re-purposed to become an integral part of a full OnGuard system - fully leveraging your hardware investment. Additionally, Lenel will implement data exchange between goEntry and OnGuard to deliver a unique hybrid solution for customers who want a mix of de-centralized, web-friendly management of some sites - along with powerful client/server centralized administration of other sites. The evolution of this solution will meet the current and future needs of the following customers...

- Small- and medium-size businesses
- Existing OnGuard large enterprise with small, locally-administered sites
- Independent entities who want to locally manage today and centrally manage tomorrow
- Companies in acquisition or transition modes, requiring a simple, temporary solution prior to upgrading to OnGuard (e.g. for a newly acquired organization)
- Franchisor/franchisee situations locally administered, but uniform across all franchises - who may want to move to centrally administered in the future
- Building owner with multiple tenants who want a mix of locally and centrally managed access control
